MEDUSA STONESET
Mortar Cement

ALLIED CHEMICAL & DYE CORPORATION, NEW YORK, N. Y.

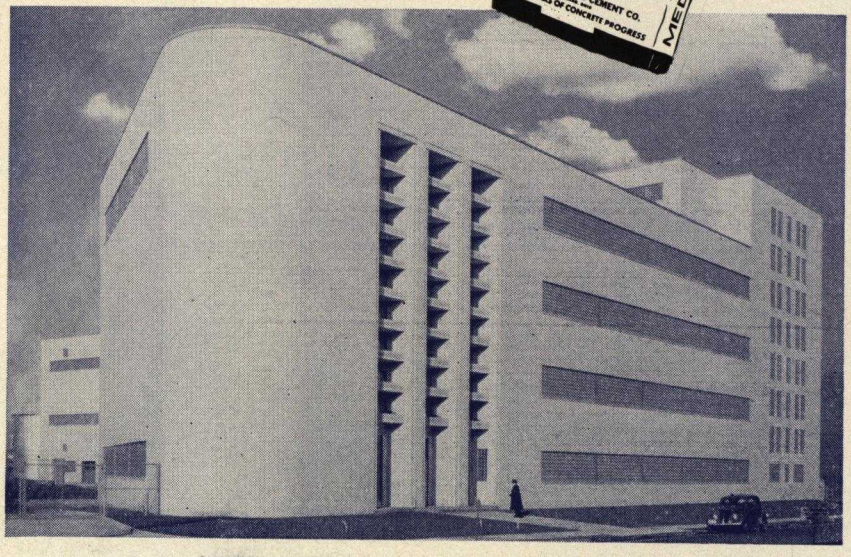
WHAT IT IS . . . Medusa Stoneset Cement is a non-staining **white mortar cement** made of select materials virtually free of stain producing water soluble alkalies. These materials, many of which are used in the manufacture of famous Medusa White Portland Cement, are combined and blended under careful methods of quality control to assure the user of a white masonry cement having the best working characteristics and hardening properties. No admixtures other than sand required. Guaranteed to comply with Federal Specification SS-C-181 and ASTM Specification C 91 for both a Type I and II Cements.

USES . . . For all applications where ordinary mortar cements are used, but where a much more **beautiful white or tinted mortar joint is desired.** Ideal for natural or face brick, cast stone, building tile, facing marble and stone, concrete and glass block.

MEDUSA BRIKSET
Mortar Cement

WHAT IT IS . . . Medusa Brikset is a beautiful soft **light-gray mortar cement.** It is economical, yet absolutely dependable. Mortar joints made with Brikset remain full . . . firm . . . free of hair-line cracks and crumbling mortar even after years of exposure to the elements. The answer to this long life is found in the careful processing techniques employed in making Brikset. Guaranteed to comply with Federal Specification SS-C-181 and ASTM Specification C 91 for both Types I and II Masonry Cements. No admixture other than sand required.

USES . . . Widely used as an economical mortar for setting all types of brick, building stone and tile, facing stone and marble, and concrete and glass blocks as well as for pointing and pargeting.



CHURCH & DWIGHT CO., INC., SYRACUSE, N. Y.

MEDUSA WHITE Portland Cement

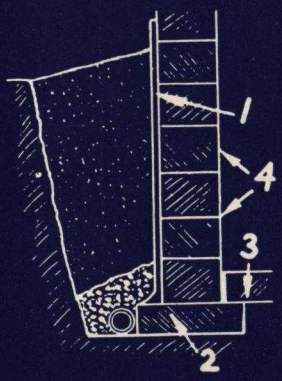
WHAT IT IS . . . Medusa White Portland Cement has been justly called the aristocrat of all Portland cements. It is a true white, non-staining **Portland cement,** used like gray Portland cement and having the same qualities and strength. It is recommended for use where a clean, white, distinctive character or beautiful color effects are desired. Guaranteed to surpass Federal Specification SS-C-192 and ASTM Specification C 150 for a Type I cement.

MEDUSA WATERPROOFED WHITE Portland cement has a waterproofing agent integrally ground during manufacture so as to produce concrete that repels water at the surface and reduces absorption of dirt.

USES . . . Medusa White—stucco, cement plaster, cast stone, concrete slabs, white mortar, terrazzo, swimming pools, curbs, road markers, sculpture, colored concrete.

Medusa Waterproofed White—Use wherever work is exposed to dirt, dampness, or the elements.

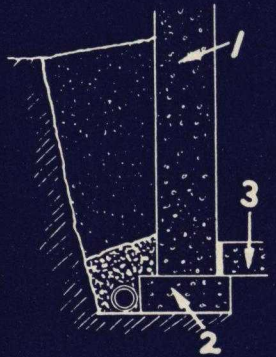
GIMBEL CHELTENHAM STORE, PHILADELPHIA, PA.



MASONRY CONSTRUCTION

Use Medusa Waterproofing in

1. A ¾ inch thick exterior plastering of basement walls.
2. Concrete footings
3. A 4 inch thick concrete floor
4. Concrete block and mortar



POURED CONCRETE CONSTRUCTION

Use Medusa Waterproofing in

1. Poured basement walls
2. Footings
3. A 4 inch thick concrete floor

MEDUSA Waterproofed Cements and Waterproofings

WHAT THEY ARE . . . Medusa Waterproofings are an integral method of making concrete impervious to water **throughout the entire mass.** They are also widely used to (1) render concrete non-absorbent which minimizes staining from dirt-laden water, (2) prevent rusting of iron reinforcing in well designed concrete and (3) prevent the possibility of water freezing in the pores causing gradual disintegration of concrete.

Medusa Water-repelling products are made in two general forms—Medusa Waterproofed Portland Cements (gray and white) and Medusa Waterproofing admixtures (paste and powder), for use with ordinary portland cements when the former are unavailable.

USES . . . Foundation Walls, Footings, Tanks and Vats, Stucco, Concrete Floors, Swimming Pools.

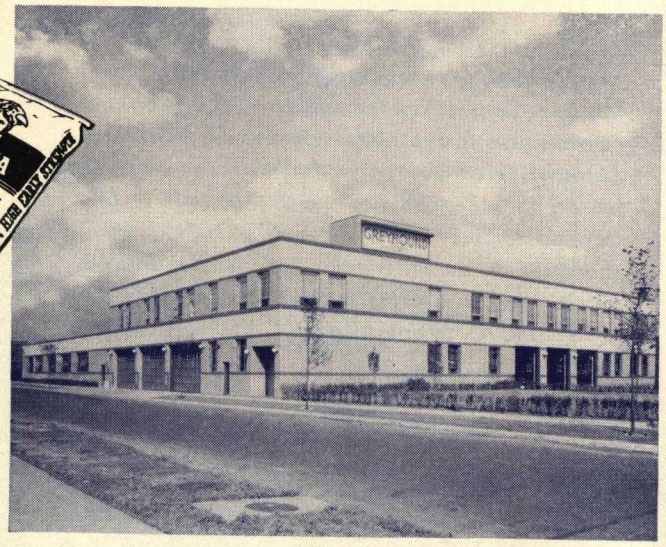
MEDUSA HIGH EARLY STRENGTH PORTLAND CEMENT

WHAT IT IS . . . Medusa High Early Strength Portland Cement is recommended for use (1) where the concrete work must be put into service at an early date, (2) in industrial and highway maintenance where repairs must be completed rapidly, and (3) for cold weather construction so that the protection period can be reduced, which in turn minimizes costs. Makes a concrete that hardens to working strength in one or two days, depending upon the type of work.

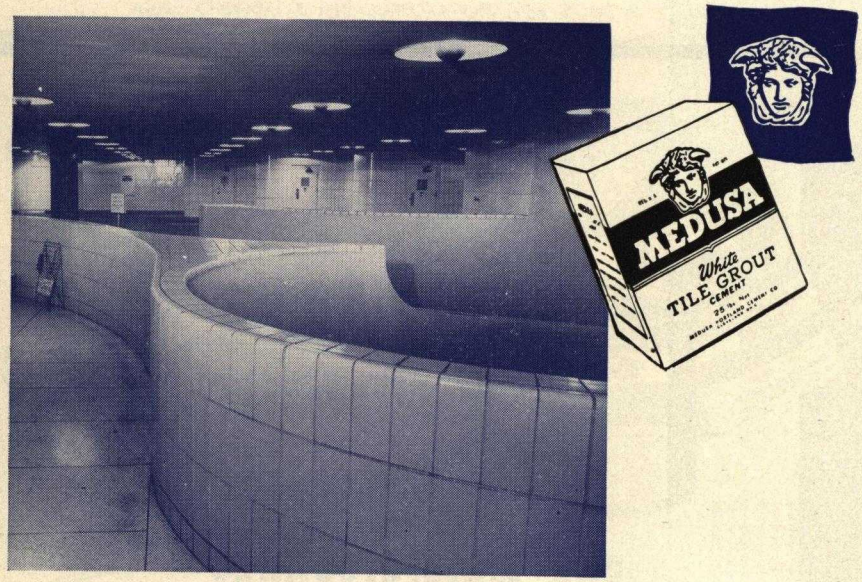
Guaranteed to comply with ASTM Specification C 150 and Federal Specification SS-C-192 for a Type III cement.

USES . . . Repair work. Cold weather concrete. Sidewalks, driveways, concrete steps.

For further information mail business reply card or contact nearest sales office.



GREYHOUND SERVICE TERMINAL, CLEVELAND, OHIO



REPUBLIC NATIONAL BANK, DALLAS, TEXAS

MEDUSA WHITE TILE GROUT

WHAT IT IS . . . Medusa White Tile Grout Cement is a special product developed by the Medusa Laboratories for the grouting of ceramic tile. It is formulated to obtain tile joints that have (1) whiter more uniform color (2) freedom from discoloration (3) better coverage (4) fewer dryouts (5) freedom from shrinkage cracks and (6) superior working properties.

USES . . . For grouting ceramic wall tile not subject to acid exposure, and for grouting ceramic floor tile where a white joint is desired.
